

## Capture the Square: Subtracting

**Step 1:** Roll two 20-sided dice or draw 2 cards from the 20 deck (see link)

**Step 2:** Find the difference.

**Step 3:** Capture one side of the square that the answer is in by drawing a line on one side of the square using your colour. If you are the one who captures the last side of the square, it is your point!

17	1	2	7	3
4	5	14	9	8
10	11	6	19	12
13	0	15	16	18
