

Make 10 or Make 20

This game can be played with a partner or a small group.

What is the purpose of this game?

- To practice finding numbers that you can add together to make 10 or 20.
- To help you establish important benchmarks of 10 and 20. This will help with adding more complex numbers later.

If you are practicing the benchmark of 10, print out this deck of cards (single sided): [Click here.](#)

If you are practicing the benchmark of 20, printout this deck of cards (single sided): [Click here.](#)

How do you play?

- There are 4 sets in each deck of cards. Choose 2 sets of 0-10 or 0-20 depending on what you are practicing.
- Lay them face up so that everyone can see all the cards.
- Take turns choosing cards that go together to make 10 or 20. You don't just have to choose 2 at a time! You can also collect 3 cards, so long as they make 10 or 20.

When all the possible combinations of 10 or 20 have been made, count up your cards. If you're playing to win, the player with the most cards is just that!
