

## Top Dog Doubles Plus 1!

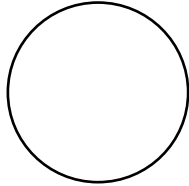

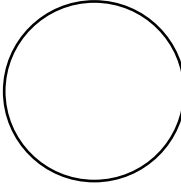

1. Roll the dice or draw a card (ace = 1, face cards removed)
2. Double it and then add 1! Put your counter on the circle next to the answer. If the spot is already taken, no problem. Put your counter over the spot.
3. **Who's the top dog?** Keep playing until the teacher says stop! Then count how many times your counter is on top. If you have the most counters, you are the top dog!
