

Name: \_\_\_\_\_

What is the value of  $n$ ? Show how you can get  $n$  by itself and keep the scales in balance.

*Example:*

$5n = 10$

$n = 2$

$\frac{n}{3} = 4$

$n =$

$6n = 42$

$n =$

$75 = 5n$

$n =$

$-16 = 4n$

$n =$

$-8n = 56$

$n =$

$-40 = \frac{n}{2}$

$n =$

$27 = -9n$

$n =$

$\frac{n}{4} = 12$

$n =$

$9n = 63$

$n =$

$-18 = 6n$

$n =$

$-4 = \frac{n}{3}$

$n =$

$\frac{n}{8} = -9$

$n =$

$12n = 60$

$n =$

$\frac{n}{-9} = 9$

$n =$

$4n = -52$

$n =$
