

Conquer the Pyramid:

Objective: Be the first to make a path from the bottom to the top of the pyramid!

You will need:

- A different coloured marker for each player. There can be 2 to 3 players.
- A 20 deck or a 20-sided dice.

How to Play:

- Players take turns drawing cards from the deck. The card drawn is the quotient of two numbers on a pyramid block.
- Find the block and claim it by laying a marker on the top of that block.
- If another player draws the same quotient, they claim the spot from you.

A pathway can be in any direction, so long it continues one step at a time from the bottom to the top. If you are the first to make one...

You win!
